Regarding the Public Consultation Paper over the Virtual Assets, I would like to propose the following point for your consideration: In order to enhance governance, risk and control, I would like to propose to have Listed companies or even other enterprises to reinforce Board members and INED should include professionals with Cybersecurity, Technology, in addition to Financial, Governance and Risk and Industry Domain knowledge,...preferably with relevant qualification, experience and/or exposure. In fact, A the Board Level and even management team, I would strongly recommend SFC extend this practice/prerequisite to all Listco's monitored by SFC and HKEx, especially for financial services, telecommunications and highly automated and digitized environments....etc.
